PREP FIRE

Hello and welcome to the latest issue of *VFTT*.

I’m scrapping the barrel a bit for material at the moment, as can be seen from the small article about spraying fire, and Eoin Corrigan’s rather larger article which is primarily aimed at convincing non-*ASL*ers how great the game is. And if you’re reading *VFTT* you probably don’t need to be told that.

I’d love to continue *VFTT*, but without an influx of material it’s gonna be difficult. I do have an article about the Italian Social Republic (RSI; Repubblica Sociale Italiana) ready for publishing, along with a couple of scenarios featuring their troops, but as I mentioned last issue, they could do with some playtesting – if you’re interested in doing so, let me know.

‘Til next issue, roll Low and Prosper.

Pete Phillipps

VIEW FROM THE TRENCHES is the quad-monthly British *ASL* journal. All comments are welcome. Even better, contribute. Write an article. Design a scenario. Share your *ASL* experiences with others. *VFTT* allows you to communicate with other *ASL*ers. Don’t be a silent voice.

Issue 95 should be out at the beginning of September 2015.

VFTT costs £2.00 per issue (overseas £4.00), with a year’s subscription costing £5.00 (overseas £10.00). Payment should be in pounds sterling, with cheques made out to PETE PHILLIPPS. Readers should check their address label to see when their subscription ends. You can also download *VFTT* free from the *VFTT* web site.

Back issue are now out of print but can be downloaded for free from:
<http://www.vftt.co.uk/vfttpdfs.asp>

Most products are trademarks of the companies publishing them. Use of a product name without mention of the trademark status should not be construed as a challenge to such status. Copyright for all material printed within *VFTT* remains with its author, who can be contacted via *VFTT* if you would like to reprint his/her material.

UK STOCKISTS OF THIRD PARTY PRODUCTS

To purchase other third party products such as Critical Hit, Schwerpunkt, Bounding Fire Products, or Heat of Battle contact any of the following shops.

LEISURE GAMES, 100 Ballards Lane, Finchley, London, N3 2DN. Telephone (020) 8346 2327, e-mail them at shop@leisuregames.com or go to www.leisuregames.com.

SECOND CHANCE GAMES, 182 Borough Road, Seacombe, The Wirral, L44 6NJ. Telephone (0151) 638 3535, e-mail them at sales@secondchancegames.com, or go to www.secondchancegames.com.

PLAN 9, 9 Rosemount Viaduct, Aberdeen, AB25 1NE. Telephone (01224) 624 467 or e-mail them at plan9@ibf.co.uk.

BATTLEQUEST GAMES, 29 Victory Road, Horsham, West Sussex, RH12 2JF. Telephone 01403 242003 or go to www.battlequestgames.com.

If you know of other shops stocking third party *ASL* products let me know so I can include them here in future issues.

INCOMING

THE MMP PIPELINE

Work continues on a new *Action Pack* covering the American 29th Infantry Division in Normandy, with scenarios designed by Perry Cocke, Ken Dunn, and Brian Youse, and covering everything from a seaborne assault on Omaha Beach on D-Day to the defence of Pointe du Hoc and plenty of bocage scenarios. In addition to the scenarios it will contain two maps and a single sheet of overlays.

Layout work is finishing on the *ASL Overlay Bundle* and it is expected to be on pre-order later this year. This will feature all of the non-Deluxe overlays in one package, with all art updated by Kurt Miller.

Layout continues on *Yanks*, which will be the next core module to see a 2nd edition reprint. 40 scenarios, including the 16 originally in *Yanks* and *Paratrooper*, will be included, along with an updated American Chapter H and eight maps. It is hoped to be available on pre-order later this year.

Work continues on the *Korean War ASL* module. Several mini-tournaments were run at MMP's Winter Offensive tournament in January. One unusual feature of the four maps it will include is that, while each may be used on their own, all four combine with one another to

form one large hill mass. This module might be available for pre-order by the end of 2015.

TACTICAL CANADIANS

Lone Canuck Publishing have several new Tactical Missions being playtested. *The Drive for St. Lo* is set in Normandy in July 1944, *Hell's Highway* takes places during the Market-Garden operation in September 1944, and *Opening the Baltic Gap* is set on the East Front in July 1944. If you would like to help with playtesting send an email to Lone Canuck at georgekelln@gmail.com.

FROM FRANCE WITH LOVE

Le Franc Tireur have a mass of projects in the pipeline. Coming soon is a second edition of the Rat Charts they produced in 2013. This revised edition will increase from 28 to 36 pages and include the National Capabilities Chart, information from Hakkaa Paalle, alphabetical terrain charts for chaps B, F and G, several other new charts, and incorporate errata from the original. This is provisionally due for a release in July or August.

Also being worked on are a *Kampfgruppe Scherer Player's Guide*, *Le Franc Tiruer 14* (which will focus on Italy), *Deluxe Pack 2*, and *From The Cellar 8* (covering Free French and late war actions).

BUNKER 40

Dispatches from the Bunker 40 was released at the end of March, and included four new scenarios.

A four issue subscription starting with issue 40 is \$15.00, while a 'Digital The WORKS' order containing PDFs of all prior issues plus a subscription starting with issue 40) is \$60.00. Individual PDF back issues are available for \$3.00 each, except for issues 2-8, 10, 13, and 16-19 which have had their material which was reprinted in *Out of the Bunker* replaced and are only £2.00 each. Issue 1 is available for free upon request, by emailing them at aslunker@aol.com. You can pay by PayPal to PinkFloydFan1954@aol.com or by cheques made payable to Vic Provost and sent to Dispatches from the Bunker, P.O. Box 2024, Hinsdale MA 01235.

Normal Service Resumed

The latest HEROES tournament took place over the weekend of Thursday 4 to Sunday 8 March. For years the tournament has needed five rounds to determine a winner, but in the last two years there were only 16 people playing in the tournament, so there was a winner at the end of the fourth round, which took place on Saturday evening and made the fifth round on Sunday morning unnecessary. With this in mind, this year's tournament was based on the assumption that only four rounds would be needed. Opinion on whether to have two rounds on Friday and two on Saturday, or one on Friday, two on Saturday and one on Sunday was pretty evenly divided, with the latter just being favoured. This was also my preferred option, as it would be easier to add another round on Friday if the numbers taking part were higher than planned.

As it was, there were only 16 people taking part, with the other dozen or so attendees using the weekend as a chance to play the larger, meatier games that are difficult to finish in an evening or a day.

Players were seeded into two groups for the first two rounds and the same seed from each group were paired against each other (EG seed 1 in each group played each other, seed 2 played each other etc). For the third round, a random draw of the four undefeated players (in the manner of the FA Cup, with a 'home' and 'away' player draw by two neutrals) was conducted, resulting in Mark Blackmore playing Nigel Blair and Craig Benn playing Ian Morris. Mark and Craig both won, leaving them to play each other in the final for the third time in the last four years (only the appearance of

Toby Pilling in 2014 has interrupted the sequence). As in the previous two finals between them, Craig won.

At the other end of the table, Ray Porter showed that his 2014 success in avoiding the wooden spoon was a fluke as he managed to lose the 'final' to Neil Brunger.

A usual there where a number of additional prizes being contested over the weekend. For rolling eight snake-eyes in a scenario Ian Pollard won a Lone Canuck tournament pack, while Neil Brunger won a copy for rolling seven box-cars in a scenario. No one managed to cross off all the events on their Bingo card and as a result the prize (a copy of the rare *Wave the White Flag* prisoner SMC counters produced by Daniel Zucker in the late 90s) went to Paul Legg, who managed to cross off eight of the twelve.

One newcomer to the game, Rob Bywater, turned up on Friday morning to get a chance to meet other players (several of those in attendance lived within an hour's drive of him), and to have a chance to see the game being played by more experienced people. He sat in on a short game between myself and Paul Saunders, a veteran player making his first appearance at the tournament since 2003! Had we been playing on our own the game would probably have taken less than two hours to finish, but because we were explaining as much as we were playing, the game took over four hours to complete. Rob really enjoyed the experience and found it very educational, and subsequently played

a game against Paul for the rest of the day, a game that was beyond his limited experience at that point. Despite this he had a great time. As others have discovered over the years, the game is easier to learn playing against a helpful mentor, and most of the more experienced players are more than happy to help a 'newbie' learn the game.

Michael Davies, Craig Benn and Mark Blackmore joined the '100 Club', IE people who have played 100 Crusader Ladder rated games at UK tournaments, while I joined the '200 Club'. What was really interesting was that Nigel Blair was the opponent for everyone! In the cases of Michael and Craig this had been planned in advance as they were both on 99 games before the tournament, while I was on 198 and arranged a game against Martin Mayers before playing Nigel. But Mark was only on 92 games before the tournament and although there was every chance that Mark could manage eight games to join the 100 Club, it was likely that game 100 would be the semi-final or final of the tournament. Yet somehow Nigel managed to go against form and reach the semi-final. Not only that, the random draw for the match ups ended up with Nigel and Mark playing each other!

HEROES 2016 will take place over the weekend of Thursday 10 to Sunday 13 March, a week later than normal to avoid clashing with Mother's Day!

Double One 2015

Thursday June 25th to Sunday June 28th

The London ASL tournament "Double One" is set for the weekend of June 25th to 28th, returning to the regular venue, Writtle College.

Double One's college venue offers excellent value for money bed and breakfast accommodation, large gaming rooms, open for extended gaming times across the whole weekend, and is located close to Chelmsford, Essex, with easy access to London via a 40 minute main rail link, the M25, and Stansted international airport.

The weekend

The tournament starts on the Thursday evening with a meal off campus. We will be returning to the local Indian/Chinese restaurant about $\frac{1}{2}$ mile walk from the college, which does a superb buffet deal.

The gaming room opens at 8.30am on Friday 26th June. We will be running several one day minis (consisting of 4 participants, straight knock out) but players might like to consider tackling one of those big monster scenarios that you never get chance to play in a morning or afternoon.

On Saturday morning, players will have the option to continue open gaming or enter the main tournament. Participants that want to take part in the latter will be entered approximately according to their ASL ladder rating.

Players will be organised into groups of 4, and will play each other on a round robin basis. Round 1 commences at 9.00am, round 2 by 2.30pm, and round 3 on Sunday morning at 9.00am. Details of the tournament scenarios will be released in published on the website in early 2015.

The venue

The tournament's venue will be the Writtle Room, Writtle College, Lordships Road, Writtle, Chelmsford, Essex CM1 3RR - www.writtle.ac.uk. Room opening times are 8.30am - midnight Friday, 8am-midnight Saturday, and 8am-3.00pm Sunday (prize giving circa 2.30pm)

The venue is less than 2 miles outside Chelmsford and is easily accessible:

- By car - the college is less than 15 miles from both junction 28 of the M25 and junction 7 of the M11.
- By train - Chelmsford station has a regular direct service on the London Liverpool Street line. Free pick ups and travel between the station and college can be arranged with the organisers
- By plane - London Stansted airport is less than 30 minutes from the venue, and for those flying into Stansted, free pick ups and transportation can again be arranged with the organisers.

Participants intending to stay overnight should book their B&B accommodation directly with the college (£30.00 plus VAT per person per night). Contact the organisers for a booking form and T&Cs. Further information can be obtained by contacting the college (phone +44 (0) 1245 424200 ext 25645)

The college has a licensed bar which will be open during the weekend. Sandwiches and snacks will also be available. Writtle village is a very short walk from the college, with a varied selection of pubs, restaurants and a mid-sized supermarket.

Attendance fees

The attendance fee for the weekend is £15.00. Payment can be made by either Paypal or cheque.

For further details, please either visit the tournament's website at www.doubleone-online.net or contact the organisers as follows:

Derek Cox, Whiteways, 77a St Nicholas Road, Witham, Essex, CM8 2JE
derek.cox@dsl.pipex.com

You can also keep up to date with developments by joining the London ASL Yahoo Group - <http://uk.groups.yahoo.com/group/LASL>

We look forward to welcoming you to Double One in 2015

BoardGame  Guru

The Panzer III

Paul Weir

The following article is based on several posts Paul made to the GameSquad ASL at <http://forums.gamesquad.com/show-thread.php?121240-The-Panzer-III-was-it-really-that-dynamic>, and is used with his permission – (Pete)

As an occasional model builder, I have to confess that the early war tin cans have a special place in my affections. As ugly mechanical beasts go, the Panzer III series are the best looking of the early war tanks, though the BT-5/7 series do give them a good run for their money.

Of all nations tanks I have to prefer the Soviets for sheer looks. Though in design philosophy the T-34 m1940/1941 is more tractor than anything else, it has the looks of a sports car. They did produce lots of armour that was not up to scratch for their time, like the T-60/70/80 (I am excluding the T-40 and earlier T-27/37/38 as they were intended to be recon machines, not tank substitutes). On the other hand they could be produced in car/truck factories which did not have the ability to handle anything from 20tons upwards, so it was a good way to use limited industrial resources.

I would say that the Panzer III was the peak of pre-war German tank design, what the Germans really wanted from the start. The Panzer I was just a training vehicle while the Panzer II was a stopgap battle tank while the Panzer III and Panzer IV were being developed, that was intended to be relegated to the recon role once its intended successors became plentiful.

The Panzer III went through three major hull layouts, three armour standards,

three suspensions and four MA fittings. The first hull layout was on the Panzer III A-D with things like the muffler exposed at the rear and only about 16mm armour basis and are the most unlike the later ones. The second started with the Panzer III E with 30mm basis and subsequently simplified from the Ausf J onwards with 50mm as the goal. The Ausf A original large wheel spring based (though, like the LT vz. 38 aka Panzer 38(t) it looks like Christie or torsion bar, it is neither), was soon replaced by variants of the 8 wheel small wheel leaf spring in the Ausf B-D and finally got to the torsion bar Ausf E+ that is the standard for tanks even to this day. Guderian originally wanted to arm the Panzer III with the 5cm L/42 right from the start but was overruled by the bureaucrats in the Ordnance Department who wanted to share guns and ammunition with the infantry 3.7cm PaK 35/36 (37L). He did manage to ensure a big enough turret and turret ring to ensure that it could be done later. When upgunning time came around, Hitler viewed the options and wanted to go straight to the 5cm L/60 KwK 39 (50L) rather than the 5cm L/42 KwK 38 (50) as part of the preparations for *Barbarossa*, but was quietly ignored by the same bureaucrats. Quite good with the trees, but had major problems with woods, our lad Adolf. The change to the 7.5cm L/24 KwK 37 (75*) was less an upgrade, more a side step as the 50L and 75* were roughly of the same weight, recoil and round size.

Though not the first German true battle tank, the Panzer IV having settled down to its final form from the Panzer IV Ausf B onwards a year or two earlier, it had all the features that would be regarded as required or ideal in a late war tank: Three man turret with good vision devices, radio

and crew intercoms, armoured bins for MA ammo stowage, welded tough but not too brittle armour, torsion bar suspension and a gun with a decent AP performance. The only thing that it lacked (unlike the Panzer IV) was a turret basket.

Panzer III or IV?

The big question is why a Panzer III and Panzer IV? They were both in roughly the same weight, size, crew, engine and armour class (OK the Panzer III (E+) had 30mm minimum all round as it was expected to be in the thick of it unlike the Panzer IV which was supposed to hang back and only had 30mm basis at the front in the main production series (D-E)). It would have made much more sense to have had a slightly bigger Panzer III to fill both roles as it had a more advanced suspension and other features. The only saving grace is that so many components were in common. Apart from the obvious like radios, MGs, crew tools, driving lights and the like, the engines, transmission, cupolas, turret doors, vision blocks, hull MG mounts, turret stowage bins and the proverbial thousand and one fittings were shared. These are the sort of things that little by little add significantly to production costs, so there were some savings. There were various plans and prototypes to field a combined Panzer III/IV hull during the war, the only thing to show for it were the *Nashorn/Hummel* chassis, but were overtaken by the need to field a T-34 competitor. The Panzer III/IV split was typical of the German war effort with much duplication of effort.

On the other hand the Panzer III was able to field four (or third and half if you like) armament upgrades. The British only

A Panzer IIIE.

A Panzer IIIJ of 14 Panzer Division in Russia in 1942.

managed to do two, the Crusader (2lbr to 6lbr, **40L** to **57L**) with the Valentine and Churchill managing two and a half (2lbr to 6lbr to 75mm QF, **40L** to **57L** to **75**) as the 75mm QF was just a 6lbr rebored to fire US 75mm ammunition. The US and Soviets only managed two, 75mm to 76mm and 76mm to 85mm on any one tank chassis. The British did, on the other hand, use the same vehicle for both their AP and CS vehicles with 2lbr/6lbr/75mm having 3.7"/3"/95mm mortar/howitzers variants in the same otherwise identical tank.

The Panzer III was undoubtedly the best tank at the start of the war and would have enjoyed longer success if not for the Soviets and US who clearly did not read the upgrade sequence manual that everyone else was reading. The Soviets got couple of Panzer III Ausf E or F pre-*Barbarossa* and considered them over if well engineered toys, under armed and armoured. The three essential attributes of a tank are mobility, armour and firepower and the Soviets had trouble believing that the Panzer III and IV were the best that Germany had to offer. The British took until the Cromwell to catch up or surpass and by then had the US Sherman available in large numbers.

Despite my criticism of German tank development, ignoring light and Czech tanks, they managed with wartime manufacturing just three medium and two heavy tank designs, the US with three mediums, the M3 Stuart (which was practically a medium at its introduction), the M3 Lee and M4 Sherman and the Soviets just one medium and two heavy tanks (though the IS series is nearly but not quite a KV redo, like the Tiger I and II). The British on the other hand had six Cruiser/medium (A9, A10, A13, A15 Crusader, A27 Cromwell and A34 Comet) and four Infantry/heavy tanks (Matilda I and II, Valentine and Churchill). Though not having things as simple as the Soviets and to a lesser extent the US (think of the multitude of engine options in the M4, 4 service versions: M4/M4A1, M4A2, M4A3 and M4A4 compared to the Soviet V2 diesel

minor variants in T-34, KV and IS), they were still way ahead of the British. The less said about Italian and Japanese armour the sooner forgotten.

Adding Historical Chrome

For those who like their *ASL* trivia, for the Panzer III Ausf E and all later models ignore C7.2 Case A (no +1 to basic TK for rear shots), for Ausf L/M and N treat front non CH TH doubles (2+2, 3+3, etc) as having 8 hull AF and for J, L/M and N treat rear non CH TH doubles as having 6 AF. All from the Ausf E had 30mm minimum all round with almost no weak spots from exhaust holes, etc not covered by armour. The L/M and N had 20mm spaced armour added to the driver's plate and the J onwards had 50mm armour on the upper hull rear plates, partially to counterbalance the increased frontal armour. For nitpickers only!

One thing about the *ASL* version of the Panzer III E (and A-D) that seems wrong is the B11 for the **37L** MA. While I have read many complaints about its AP performance and the low HE content of its HE shells, I have never read anything bad about the reliability of its gun. In addition it had plenty of rounds, around 100, so had a much lower risk of running out. Its AP penetration, HE shell and internal mantle might have been weak but it was a simple and reliable weapon like nearly all 25-50mm non-fully automatic guns of that time.

The Panzer III N abandoned the use of the 7.5cm KwK 37 AP shell for the HEAT round and from crew AARs seem to have been quite pleased with it. It's main use was a mix of better HE support for 5cm armed Panzer III instead of the Panzer IV (D-F1) which now in the F2-J versions were the main AT assets and as a close support tank in early Tiger I companies as 'wingmen'. H9 seems a bit low for the only available anti-tank shell. I would similarly regard the AP7 of the early Panzer IV as too low as they carried about 25 AP rounds (a quarter of their total load) which is B(10) for a limited

ammo load vehicle. Similarly a quarter of a StuG III B's ammo would be AP, but with a lower total number of rounds AP9 would seem about right.

So to add to my Panzer III 'flavour', ignore B11 on **37L** armed Panzer III (IE treat it as B12), bring the Panzer III Ausf N H9 to H10 (or just possibly H11 depending upon historical action) and bring the early Panzer IV AP7 to AP10 and the StuG III B AP7 to AP9. When HEAT becomes available for the early Panzer IV and StuG III B, then you could reduce the new AP by 1, IE to AP9 and AP8 respectively if you want.

Treadhead Trivia

The Bovington Panzer III (bottom left) is a moderately early Panzer III Ausf L. It has the final hull form introduced with the Ausf J and original style lights so is prior to Ausf M. It has no visors flaps on the turret sides, though still on the turret doors, they were dropped on the Ausf L, but still has the hull side hatches which were dropped a third or half way through Ausf L production.

The Munster Panzer III (bottom right) is a tiny bit confusing, nearly everything says Ausf M, especially the deep wading exhaust muffler, but the lights are of the earlier pattern. So either it is an early Ausf M that the factory used up the last of old parts on or a restoration artefact/limitation.

The Munster StuG III is a late production Ausf G with cast mantle with a hole for the CMG and though is missing the remote AA MG mounting it does not have the earlier Ausf G loader's MG shield and the loaders hatch panels open sideways rather than the earlier front and rear opening ones.

Ω

Advanced Squad Leader

Is the Greatest Wargame Ever Published

Eoin Corrigan

The following article was published by Eoin Corrigan on BoardGameGeek (<http://boardgamegeek.com/thread/1004347/majestic>) and is published with his permission. Although it could probably be considered as 'preaching to the converted' for readers of VFTT, it serves as an excellent article to show to potential newcomers – Pete.

Let's begin with a provocative statement: *Advanced Squad Leader* is the greatest wargame ever published. Obviously, I'm unashamedly partisan. My purpose in writing this review is to persuade you that the preceding statement is true.

Following the success of its predecessor system, *Squad Leader*, Avalon

Hill published *ASL* in 1985. At its core are the rules, the famous three ring binder of several hundred pages. *Beyond Valor* is the first of the modules and provides the German and Soviet orders of battle, the necessary information counters, 20 odd scenarios and the map boards on which its scenarios are played. A series of further modules provide the counters, rules and map boards necessary to play a scenario based on almost any tactical engagement which occurred during WWII.

ASL as a play experience is usually based around a scenario, almost always a one page document which describes the victory conditions, the general environmental conditions, the map boards depicting the terrain and the infantry units,

vehicles and guns which will be used in that scenario. In all but a few cases, scenarios are based on an actual historical engagement, although often the representation is somewhat stylised; this is a game, after all, not historical research. Both players set up their forces and begin play, which generally proceeds on an IGO, UGO turn basis, which is familiar to most wargamers and indeed most gamers of any hue. The core of the game is an elegant set of mechanics which are far less complex than the game's reputation suggests.

Those are the basics. If I may, I think it may be worthwhile at this point to address some of the obvious objections to my opening statement.

Yes, *ASL* is expensive. So are most things in life worth having. You can't take it with you, so why not spend your money on things which will improve your life? Like *ASL*, for instance.

Yes, it can be difficult to source out of print modules. For those of us who have begun playing *ASL* during the last 10 years this has been a fact of life. However, out of print components of the system are reprinted and, in the interim, it's possible to source second-hand copies or to simply play the many, many thousands of scenarios which are playable right now with in print material. You don't need to own the entire system to play. Take the long view.

Yes, learning to play competently can be a challenge. So what? Step up. Learning to play *ASL* well is the wargaming equivalent of the marathon. *ASL* is obviously not a svelte Euro; the system provides more text describing Belgian armoured vehicles than the entire rules set of some other tactical wargames. That's a feature, not a flaw. Besides which, no pain, no gain, my friends. And if you're having trouble with the rules you can avail of a lot of help along the way.

Yes, *ASL* is chrome rich. But this chrome is usually associated with a dilemma or two, with a set of potential benefits and risks which amplify a play experience which is already decision-rich.

A Failed Simulation

While we're here, let's put another criticism to bed. *ASL* is not a simulation of a WWII company level commander's lot

SQUAD LEADER

Russian, American, and German forces engage in bloody street fights, descend on enemy held villages, take key hills, or cross open fields in the quintessence of infantry combat. This is *SQUAD LEADER*—a game utilizing every aspect of infantry warfare from street fighting in Stalingrad to armored advances across snow-covered roads in the Ardennes. *SQUAD LEADER* is not just a game—it is a system enabling the player who has mastered it to replay virtually any battalion level action of WW II in Europe.

Borrowing heavily from miniatures rules, noted game designer John Hill has designed an ingenious new game system which approaches the effects of simultaneous movement within an elaborate 8 phase player turn. Developer Don Greenwood has streamlined the system for the utmost in playability in what otherwise would be an extremely complicated game.

SQUAD LEADER utilizes Programmed Instruction to introduce each of its 12 scenarios gradually so the player need read only a fraction of the overall rules to get started. Once the player feels comfortable with the game system he can go on to other scenarios, adding more complexity as he goes.

The units are 10 man squads, 4-5 man crews and individual leader counters. They have a large assortment of support weapons, including various types of machine guns, flamethrowers, demolition charges, smoke, panzerfausts, bazookas, radios, anti-tank guns and an assortment of vehicles and AFVs. Each turn simulates the passage of two minutes. Each large 3/4" hex equals 40 meters of actual terrain.

Leaders play a major role in the game by directing fire, rallying broken units, and generally enhancing the performances of their troops. The underlying theme of *SQUAD LEADER* is one hinged on morale. The player who can utilize his leaders most effectively to direct fire on the opposition while keeping his own forces under cover & out of enemy fire lanes will usually be the winner. Usually because nothing is ever 100% certain in *SQUAD LEADER*. It is possible, although highly unlikely, that a single leader could best three enemy squads in close combat or that a squad without anti-tank weapons could knock out a tank. In one of our playtest games a single German heavy machinegun crew practically wiped out a singlehandedly, at long range, an entire Russian battalion advancing across open terrain. In another, a squad in moderate cover withstood the entire firepower (including armor) of a reinforced company for 3 turns! As in combat, nothing is certain and while repulsing a Russian human wave attack, your machinegun may jam or your squad may decide it's safer in the rear. The unpredictable nature of all units under fire is both the blessing and the bane of *SQUAD LEADER* commanders.

In the advanced scenarios, the game expands to incorporate Offboard Artillery, night rules, barbed wire, entrenchments, minefields, bunkers, multi-level buildings, rubble, fire, river crossings, snow, roadblocks, mortar, etc. Yet the biggest option is the very open-ended nature of the game itself. Complete Design Your Own and Campaign Game systems have been included to allow players an infinite variety of individual scenarios and extended campaigns.

SQUAD LEADER comes boxed complete with four 8" x 22" interchangeable full color isometric boards, 716 two-sided counters, 36 pp. rulebook, scenario cards, two Quick Reference Data Cards, and two dice.

SQUAD LEADER is available only by mail from Avalon Hill for \$12.00 plus postage. Maryland residents add 5% state sales tax. WARNING: *SQUAD LEADER* is not for the uninitiated—rated Tournament Level IV on the Avalon Hill complexity scale. Counter illustrations actual size.

Advert for the original edition of Squad Leader from The General Vol 14 No 2.

VIEW FROM THE TRENCHES 94 - MAY - AUG 2015

11

(nor, for that matter, is any other multiplayer tactical wargame played for fun). The 'failed-simulation critique' is often levelled at *ASL* and is based on a misunderstanding, wilful or otherwise, of what a simulation is. In *ASL*, each player has:

Perfect knowledge of the OOB of both sides.

Almost perfect knowledge of the opponent's forces.

Real time perfect knowledge of the quality, status and location of friendly forces.

Perfect knowledge of the terrain.

An abundance of control. Players decide the exact movement of individual men and small units. Players decide on the engagement priorities of each and every weapon system and infantry unit.

Absolute victory conditions. Force preservation is, more often than not, irrelevant. In a standard scenario, casualty rates will be extremely high, as one or both sides fight to utter destruction.

A simulation of a WWII company commander's perspective would be a very different creature. A host of information and control constraints would be required which would compromise the fun aspect. An umpire would also be required. If you're looking for a two player simulation look elsewhere and bear in mind that you'll probably have to look far beyond sites such as Boardgamegeek.com.

ASL is a game and it has limitations. Don't mistake detail for simulation. Winning a couple of scenarios will not qualify you to lead men into high intensity combat. Recruiting officers from your nation's military will not be handing you a commission after your first tournament win.

Design Concepts

Now that we've dispatched the simulation red herring, some words on *ASL*'s purpose. The game's intellectual origins lie in *Squad Leader*, its fêted predecessor, which was based on two primary conceptual platforms.

First, post WWII studies performed by the US Army which indicated that the performance of a given tactical unit under fire is highly dependent on the actions of a few individuals. These individuals are not necessarily the NCOs and junior officers, although they are often found in those ranks. These are the individuals who demonstrate initiative, bravery and leadership, the men who turn and win battles.

Second, the observation that an assault is generally preceded by a bombardment. *ASL* inherits its turn structure from *Squad Leader*, in which the preparatory fire phase, which represents fire

to reduce and suppress the enemy, precedes movement.

These are the core elements of *ASL*'s intellectual inheritance. *ASL* is a refined, more coherent and fuller expression than *Squad Leader*. *ASL*'s grand success lies in the fact that its design ambition was to go much, much further than any predecessor had dared. The goal of *ASL*'s designers was to produce a system which could represent or portray any tactical engagement which occurred during WWII. *ASL* is designed to comprehend the whole land war at the tactical level; every theatre, every front, every major weapon system, every belligerent, every season, every weather condition, every tactical situation.

ASL has delivered on this design goal. In so doing it has provided us with some superb vistas:

Vicious clashes of Nationalist Chinese and Imperial Japanese Army infantry and armour in 1937.

The frustration of German anti-tank gunners facing France's Char B1bis outside the village of Stonne in the summer of 1940.

Dutch colonial troops outclassed by the offensive flexibility of the Japanese army amid their assault on the East Indies in 1941.

Partisan ambushes against rear echelon Axis troops in Croatia.

Budapest under siege in the winter of 1944. The gradual degradation of the defending Hungarian, Wehrmacht and SS troops as ammunition, fuel and food supplies dwindle.

Anxious advances by US infantry through the ruins of Aachen, fearful of the inevitable ambush.

Imperial Japanese troops defending tiny atolls against the awesome firepower of a late war American amphibious assault.

ASL has taken many of us to these places; the game sketches such diverse actions very well. And in so doing, the game can provide some insights into why the war was fought in certain ways, and why certain armies tended to prevail in certain circumstances.

In many respects *ASL* represents continuity in wargame design. Modular map-boards with hexagonal grids and combat result tables were long established features of wargames in 1985. *ASL* innovated elsewhere, along two principal avenues. As described, it sought to be all-encompassing. This goal was, and remains, a hugely innovative objective which no other tactical game of World War II has come close to realising, or even attempting. The second path of innovation is gameplay related. The structure of each player turn is relatively simple: rally, conduct preparatory

fire, move, take defensive fire, conduct advancing fire, rout, advance and close combat, a sequence largely inherited from *Squad Leader*. *ASL*'s great leap forward is in the mechanics of defensive fire occurring during the Movement Phase, a time when moving units are particularly vulnerable. In short, a defending unit may interrupt movement and fire on a moving attacker; however the defending unit may usually fire again at the same moving unit or other moving units subject to certain limitations. A consequence of the defensive fire mechanics is that each player's Movement Phase fully involves both players in a sub-game, with a quasi-psychological component, of movement and defensive fire. It's a vastly engaging element of the game during which both players are totally involved. Rapid decision making based on sound judgement and an understanding of attacking and defensive priorities is required. As the phase progresses, the complex interplay of risk and benefit shifts, requiring fresh mental calculations. Perhaps more than any other aspect of the game, this is where games are won and lost, the part of the game which distinguishes poor players from good players.

Friction

Player decisions and agency aren't the be all and end all, however. Playing the game can be a frantic, chaotic experience. Friction on the battlefield is well represented in *ASL*. The sniper mechanism is a roving element designed to both provide random loss of cohesion and also to check the good fortune of the side which is benefitting from the better die rolls. In most scenarios, a high frequency of low dice rolls by a player has a greater chance of activating the enemy sniper who may wound or kill leaders and heroes, pin or break squads and even cause tanks and other AFVs to depart the battlefield due to the loss of exposed crew. This is another example of a typical dilemma served up by *ASL*'s mechanics. Does a player expose his AFV crews to avoid poor vision related fire penalties, or are they exposed to enemy fire? It's your choice. The rolling of double-6 boxcars can also have disastrous consequences as weapons systems fail, vehicles fail to start or units take unexpected casualties. However, the friction depicted shouldn't give the impression that the game is a free for all dice-fest, devoid of skill. Good players mitigate risk and ride Fortuna's wave. *ASL* tournaments are dominated by a small cohort of elite players; these are the players who consistently make the best decisions.

The game has what may seem to be a schizophrenic relationship with history. In some respects it seeks to be faithful, in others *ASL* departs from history. My argument is that *ASL* consistently and

sensibly privileges player latitude and agency over the imposition of historical constraints.

For instance, engagements in *ASL* tend to emphasise unit destruction and manoeuvre, and are therefore probably quite unrepresentative of many WWII assaults, particularly in the late war European theatre on the Western Front. The role of supporting artillery is present but downgraded and the role of manoeuvre units is correspondingly elevated. Company and battalion level indirect and direct fire support is often absent; for instance, by the end of the war German infantry companies were each allocated three 81mm mortar tubes. These weapons are rarely represented in *ASL*.

The nature of engagements is different to that often depicted in the historical record. In very few *ASL* scenarios does a defending unit take 10-15% casualties and then elect to undertake an orderly withdrawal as generally tended to occur in real life; in most cases units fight to their utter destruction. Similarly, attacks are often high intensity and very direct. Formal reconnaissance is largely irrelevant or is outside the scope of the typical scenario; if it does occur in the course of a scenario it's usually achieved by aggressive manoeuvre or reconnaissance-by-fire, as opposed to a cautious advance by specialist regimental or divisional reconnaissance assets. If WWII had actually been fought this way it would have ended a lot sooner.

ASL does not enforce doctrinal imperatives. For instance, *ASL* allows, and even encourages in some circumstances, a panzer grenadier commander to use his halftracks with reckless aggression, to levels which would likely have resulted in a court martial. Specialist units, such as AFV crews which have abandoned hors de combat

vehicles, are not safely ushered to the rear but are usually thrown into engagements for which they had little training. There are different schools of thought; some players generally try to avoid ahistorical practices and especially the (mis)use of transport assets. I generally don't like to play against opponents who accompany their attack with a host of empty trucks seeking cheap overrun targets. Other players have no problem at all with such practices. Fortunately, it's easy to find players who share one's preferences.

Maintaining the Historical Record

In other ways *ASL* displays faith with the historical record, although again I stress that it does so with gameplay in mind.

Nationality distinctions are an important feature of the game. Different nationalities have differing squad types. Nationalities are further distinguished by Heat of Battle modifiers; an elite German squad is far more likely to produce a hero or become fanatic than a conscript Romanian squad. Certain nationalities also have special rules. Pre-October 1942 Soviet units may be accompanied by political commissars. Certain Chinese infantry units have close combat bonuses and may voluntarily go berserk. Most Commonwealth squad types have steady nerves and therefore do not cower, which has important implications for defensive fire. The *ASL* designer notes freely admit that the nationality distinctions are based on stereotypes. I think it's fair to say that they are also inaccurate, in several respects. For instance, the treatment of elite Italian units, such as the famed Alpini or Folgore, surely does a disservice to those high quality formations with proud combat records. However, with minimal rules overhead, belligerents are well differentiated

and the points of differentiation tend to produce interesting narratives. Most *ASL* players have a story about how a Soviet conscript squad has won them a scenario with an unlikely act of derring-do.

The Japanese in *ASL* deserve special mention. At first glance, their squads and half-squads seem unremarkable. However, some ingenious mechanisms specific to Japanese units lend them a very special flavour. Japanese infantry tend not to break; instead they step reduce. Their leaders never break. Japanese can launch a special form of human wave attack, the famed banzai charge which, when used well, can win a scenario outright. The Japanese are depicted as close combat experts with a great skill for camouflage and concealment. Japanese units are also skilled in the use of set demolition charges and may produce tank hunter heroes; in modern parlance, IEDs and suicide bombers. All in all, these qualities provide scenarios featuring the Japanese with a unique set of characteristics which are highly entertaining to play with or against. Happily, the Pacific Theatre expansion for *ASL*, *Rising Sun*, will soon be back in print and will give a new generation of *ASL* players an opportunity to experience the many delights of the Pacific War, as rendered by *ASL*.

A further element of nationality distinction and historical accuracy is the attention paid to capturing the effect of each combatant's mix of support weapons and ordnance. The designers of *ASL* were clearly fascinated by the gadgetry of warfare. In general, support weapons are assigned to squads and half squads and are individually depicted with their own counters. Most common are the three classes of machine gun; light, medium and heavy, the distinctions usually based on ammunition and tripod availability. Each belligerent's

machine guns have bespoke counters; a German medium machine gun is far superior to its Soviet counterpart. The famed Japanese knee mortar is depicted and is a highly effective tool. The Soviet anti-tank-rifle has a greater likelihood of penetrating armoured vehicles than similar British or French weapons due to its larger calibre. A seductive array of company level support weapons are available: flamethrowers and demolition charges for the assault engineers; low calibre mortars and direct fire guns for company level fire support; bazookas, piats and panzerschrecks for anti-armour teams. Certain weapons are abstracted, such as panzerfausts, molotov cocktails and anti-tank magnetic mines; the subsystems governing use of these abstracted weapons provide fog of war and some delicious moments of uncertainty at the cost of a little additional rules complexity.

A mechanic associated with certain shaped charge weapons which I particularly relish is the backblast rule. A player may opt to absorb the dangerous backblast effect of firing a bazooka or similar weapon from a building or rubble, but with the benefit of a much greater chance of hitting the enemy target. For me, this is a superb example of an interesting gameplay decision made possible by *ASL*'s attention to detail. The average player turn in an *ASL* game is punctuated by such dilemmas. The chrome pays off.

Geography

While *ASL*'s nationality distinctions and gadgetry fixation reveal some of the systems predilections, the vehicle and terrain rules reveal the evident fascination the designers have with the battlefields and AFVs of WWII.

ASL's depiction of the geographical environment is exceptional. Chapter B of the rules address terrain. Again, the hallmark is the comprehensive approach. It's no great insight to observe that geographic conditions have a pronounced impact on tactical considerations. The suburbs of Arnhem and the high mountains of the Caucasus are very different places. An *ASL* scenario set in Normandy's bocage, Stalingrad's factories or the Libyan coastal road will have the terrain to match. Olive groves, graveyards, swamps, wooden huts, cactus hedges etc. etc. are depicted in over 60 official geomorphic map boards. You can even send your brave boys into the sewers, hoping to emerge from a basement and achieve a close quarter ambush. The historical modules provide maps based on actual terrain, often sourced from photographs taken during aerial reconnaissance sorties. The rules differentiate terrain types in a manner which is usually simple and concise, although some of the Pacific-specific terrain types,

A poster produced by Avalon Hill to promote ASL.

such as caves and paddy fields, are overly complex. Deformation of the physical environment is not uncommon; shell-holes can be created, grain fields set alight, buildings may collapse due to large calibre high explosive hits. Achieving a hit on an enemy machine gun position which not only eliminates the crew and weapon, but which collapses an entire upper storey and sets a building ablaze is the kind of drama which *ASL* excels at delivering. And such changes can often have a huge impact on the tactical situation. The smoke produced by a burning copse can shield an assault. The collapse of a steeple can deny a perfect observation post for an artillery observer. Stuff like this doesn't happen in other games.

ASL's treatment of the urban environment is particularly notable. Sewers, cellars, roofs, burnt-out buildings,

huge factories and terraced houses are all addressed. Much of Chapter E concerns weather effects. Dry conditions result in increased chance of fires breaking out. Icy conditions freeze streams and jam weapons. Gusting winds cause fires to spread and play havoc with landing gliders. Mist and rain result in vision based modifiers to fire attacks. Mud impedes off road movement.

Vehicles

As comprehensive as *ASL*'s terrain and weather rules are, its treatment of the vehicles of war is outstanding. Turning its back entirely on the simple approach to armoured combat taken by *Squad Leader*, where it is simply treated as an adjunct to infantry combat, *ASL* fixates on the technical details. Every major vehicle of every combatant is depicted, from the

legacy WWI tanks fielded by many nations at the beginning of the war to the late war behemoths which fought on the Eastern Front in 1944 and '45. Extensive vehicle notes supplement the information found on counters and provide for bespoke rules specific to vehicles which have unusual capabilities or limitations. Reading the vehicle notes is an enjoyable and educational experience, in and of itself, and the detail provided offers its own narrative of the evolution of the war. See, for instance, the ad hoc development of tank destroyers by the Wehrmacht in late 1941, as it responded to encounters with the T-34 and KV series tanks fielded by the Soviets. Consider the very different design philosophies of the various combatants and how they evolved over time.

Even More History

Squad Leader's initial scenarios are set in Stalingrad. As a consequence, Stalingrad is a spiritual homeland for *ASL* players, the place where it all began. Stalingrad 1942 is the subject of the first historical module, *Red Barricades*. One of *ASL's* unique aspects has been the production of historical modules based on specific actions. They come with a map based on the actual battlefield and a set of scenarios describing elements of the battle. They also include campaign games which are a set of linked scenarios in which force preservation becomes an important factor. Thus far, a wide variety of official historical modules have been produced and each has been based on extensive research by the designers. Besides *Red Barricades*, others are set in the Ardennes, Normandy, Tarawa, Guadalcanal, the Rhineland and Arnhem. Most recently, *Festung Budapest* describes the late-1944 siege of Budapest. The historical module campaign games are perhaps the point at which *ASL* most closely resembles a simulation of sorts: the maps are faithful renditions of the actual terrain and the players are required to deal with some real life constraints, such as the need to limit losses and to trade space for time. Each historical module is an opportunity to experiment. *Festung Budapest* is particularly innovative as it models the impact of a protracted siege on the Hungarian and German garrison; the impacts of ammunition, fuel and food shortages are captured. The map is fantastic, a beautiful treatment of an urban battlefield completely unlike any other *ASL* map. Playing a module like *Festung Budapest* gives one a very strong sense of some of the tactical dynamics of an actual battle and the impact of the actual geography; as a player one develops a very real understanding of the savagery of a late war, urban winter siege.

Literature

Another unique aspect is that *ASL* can boast a literature of sorts. A lot of words have been written about *ASL* during its three decades of existence. The official magazines, the *ASL Annual* and *ASL Journal*, have been in semi-regular production. In recent years the *ASL Journal* has been published on a yearly basis. Although many of the older editions are out of print they are often available on sites such as Ebay, although sometimes the prices can be very high.

Third party magazines and rules guides have also been published, some of which are of extremely high quality, such as those produced by Bounding Fire Productions or Le Franc Tireur. As such, there's an extant bank of articles on specific areas of the rules, beginner's tips, scenario guides, play analysis, designer notes etc. This knowledge is extremely useful to players new to the community; a great way to learn the subtleties of play is to read articles on specific matters written by distinguished *ASL* players. A very wide range of excellent articles are available, many of which are hosted online and are free of charge.

ASL's detail and rules provides some insights into the war and how it was fought. The manner in which the game depicts WWII combat can be illustrative. The game's rules provide an answer to questions such as 'How did the Wehrmacht's Panzer IIIs and IVs overcome the Soviet KVs and T-34s during Operation Barbarossa?' A player of *ASL* will be familiar with many of the simple tenets of modern warfare. An early learning outcome for all beginners is the dangers of stacking. Fire attacks usually apply to all units in a location, so the greater the degree to which you stack, the more efficient your opponent's attacks. The game provides other lessons, such as:

The positioning of important weapons systems.

The importance of camouflage.

Combined arms, particularly the benefit of infantry and armour working well together.

The frailty of unsupported armour in urban settings.

The bankruptcy of the cavalry charge yet the continued usefulness of horse borne dismounted troops operating a la dragoons, particularly against partisan formations.

The advantage of high ground; as an *ASL* player part of the skill set you will develop is the analysis of terrain depicted on the boards, identifying vantage points, lines of sight and dead ground.

The peril defenders face when surrounded and when avenues of retreat are cut off.

For the attacker, the importance of outflanking and achieving envelopment.

The destruction of opposing infantry is often most efficiently achieved by breaking key units, penetrating the defensive line and rendering the entire position untenable, as opposed to destroying enemy units using direct fire attacks or closing to close combat and exposing your forces to the risks of close combat.

Much of *ASL's* detail is intended to cause players to incorporate actual tactical considerations into their play. Players are often incentivised by the rules to deploy their troops and weapon systems in ways which mirror historical practice. Infantry will disperse in attack and in defence. Once in contact with the enemy, your troops will assault in short dashes under cover. Tank platoons will manoeuvre together, each responsible for different sectors. Defending machine gun teams will be placed in prime vantage points, covering open ground, junctions and interdicting movement along streets. Overwatching firegroups will attempt to suppress enemy defences with weight of fire. AFVs will deploy behind walls or hull down on hillsides. In scenarios set later in the war, hidden tank-hunter infantry teams armed with shaped charge weapons will lie in wait by crossroads and bridges, hoping to ambush enemy armour. Antiaircraft halftracks will accompany your armoured columns hoping to discourage or impede enemy air support. *ASL's* rules, more often than not, encourage behaviour which maps well to how we know the armies fought.

Community

ASL's unique advantage over every other wargame is the scale and degree of connection among the playing community. Estimates of the playing population vary, however I've read that there's a core of 5,000 active players and I have no reason to dispute this. These 5,000 are largely dispersed across North America, Europe and Australia/NZ in numbers sufficient to support vibrant local clubs in many of the larger cities. There are also regular weekend tournaments which occur all over the world. Even if you lack local opposition and cannot travel to play, there's a very lively and supportive online community. There are at least two ongoing international PBEM tournaments and a less formal *ASL* Ladder. Finding an opponent is very easy. There are a number of forums where one can ask for a PBEM or live *VASL* game and I can guarantee that in 99% of cases opponents are found within 24-48 hours. And it really is a community, members of which are happy to teach newcomers and often to share or sell-at-cost material which is difficult to find or out of print.

I think it's important to dwell on the community point. Wargames are

Spraying Fire – W

designed to be played. To an unhappy degree, wargaming has taken a backseat to the hobby of collecting wargames. The wargames industry, such as it is, annually produces a quantum of games which quite obviously dwarfs the capacity of the wargaming population to play those games to any meaningful extent. As a consequence, it's all too common for a wargamer to own shelves of unplayed wargames. Possessions take precedence over experiences. *ASL* is in counterpoint to this general state of affairs. First and foremost, *ASL* is played. There may be many *ASL* collectors or those who have abandoned *ASL* for greener pastures, but there can be no doubt that *ASL* as a play phenomenon dwarfs all but a handful of other wargames. *ASL* provides a venue in which those who may be tired of buying unplayed game after unplayed game can, if they wish, halt and commit to play, as opposed to staying on the merry-go-round of new game after new game, or worse still, collecting purely for collecting's sake.

Quite aside from strength of community, *ASL* is also flourishing in another sense. Multiman Publishing, the official publisher, regularly produces new product and reprints of out of print modules. A stable of well-regarded third party publishers, such as Bounding Fire Productions, Le Franc Tireur and Friendly Fire, produce complementary material, usually scenario packs and campaign games, some of which are highly innovative. That's a remarkable testament to the strength of the fan base and the dedication of the publishers; after almost 30 years fresh, quality material is still coming.

ASL is an intense and immensely engaging game experience – decision point after decision point, dilemma after dilemma. The design's devotion to capturing detail is outstanding. The game system can describe almost any tactical engagement which occurred during the war. *ASL* boasts a large and growing literature. The system is still growing; a healthy stream of scenario packs, magazines and modules are produced every year. The community is large, friendly and supportive of new players.

For all of these reasons, *ASL* is the greatest wargame. Hence the remarkable longevity of *ASL* and its vibrant playing community.

If you haven't played *ASL* before, I hope I've convinced you to consider joining us. Buy a starter kit. Give it a go. Come join us! Come play!

Ω

This is a few random thoughts about the use of Spraying Fire, taken from a variety of sources but primarily the GameSquad *ASL* forum.

Spraying Fire (A7.34 and A9.5) allows a unit to fire at two Locations that share a common hexside with half the FP affecting each Location. A So why is Spraying Fire useful? Some players have asked why you would want to do so, as they feel it does not seem that useful. They can see the benefit of attacking two units in the Prep or Defensive Fire Phase but wonder why you would do so when the FP is halved. They also ask what use it could be in the MPH as Defensive First Fire, noting that as the enemy units move one at a time you would not know when to use Spraying Fire until it was too late.

So how can you make effective use of Spraying Fire.

As others stated, Spraying Fire acts as a 'Force Multiplier'. Although it might seem that your firepower is diluted it is not. Yes, the FP is halved for Spraying Fire, but you double the effectiveness because you are now affecting two units. Think about a 4 FP attack. You need to roll a 6 for a NMC. With Spraying Fire, you now have two attacks with 2 FP and need to roll a 5 to get both of them with a NMC. The difference between a 6 and a 5 is about 5/36, so with one 4 FP attack you have about a 15/36 chance for a NMC; with two 2 FP attacks you have a 10/36 chance for two NMC so 10/36 x 2 = 20/36 in rough terms or a 33% increase in damage done.

The effectiveness of Point Blank Spray Fire should not be overlooked, particularly in the Defensive/

Advancing Fire phases.

Spraying Fire can get you two attacks for the price of one unit when you have two adjacent enemy units (preferably in Open Ground) you'd like to affect. However, it is much more useful when you are defending an area in which your opponent has to move many units. Spraying Fire (with the idea of putting down Residual FP) can make him take many low level attacks or force him to find another way to his destination. Defending against a human wave is one example of where Spraying Fire could be useful.

Another use of Spraying fire is when you are the defender and are worried about being overrun. Imagine an AFV is about to enter your hex to VBM freeze your unit. You use Spraying Fire at PBF range at the AFV and place Residual FP in both the AFV's hex and the one adjacent to it. When your opponent runs up his Infantry he will have to take the Residual FP if he wants to CC you.

One thing to note when using Spraying Fire as Defensive First Fire into a hex devoid of moving units (EX: against a non-human wave), the FP into the empty

What's It Good For?

hex is halved again as "vs concealed unit". So firing with a 4 FP unit the Spraying Fire is 2 FP, which is halved twice to leave 0.75; Assault Fire means this is rounded up to 1 and 1 is added to make 2FP.

Spraying Fire in combination with Assault Fire can make a great combination. Assault Fire is always at least a 2 FP because (after all modifications) you round up your FP and add 1. Just look at the following examples:

A 5-4-8 Assault Fires at a target in the AFPh. 5FP is halved for AFPh to 2.5; Assault Fire means this is rounded up to 3 and 1 is added to make 4FP.

A 5-4-8 Assault Fires at a concealed target in the AFPh. 5FP is halved for AFPh to 2.5 and halved for concealment to 1.25; Assault Fire means this is rounded up to 2 and 1 is added to make 3FP.

A 5-4-8 Assault and Spraying Fires at a two targets in the AFPh. 5FP is halved for AFPh to 2.5 and halved for Spraying Fire to 1.25; Assault Fire means this is rounded up to 2 and 1 is added to make 3FP.

A 5-4-8 Assault and Spraying Fires at a two concealed targets in the AFPh. 5FP is halved for AFPh to 2.5, halved to 1.25 for concealment and halved for Spraying Fire to

0.75; Assault Fire means this is rounded up to 1 and 1 is added to make 2FP.

While on the subject of Assault Fire, think about firing from inside a moving non-stopped truck in the AFPh. Halved three times first, then maybe again for a concealed target. At a range of 6 hexes, a 6-6-6 can make a drive-by shooting at 2 FP +1 vs. a concealed unit in woods. At a range of 3 hexes, they can use Spraying Fire into an adjacent hex too, maybe looking for a possible HIP unit. And both shots are still 2+1.

Leaving Residual FP aside, one of the best experiences you can have with Spraying Fire can come with exceptional Leadership modifiers. For example, playing 'The Guards Counterattack' the Russians can stack the 10-2 and three 6-2-8 squads together and hit one Location of the 1F5 stone building with a 16FP +1 attack, or they can use Spraying Fire to attack two Locations with an 8FP +1 attack. Spraying Fire can also be used to affect two units on different but adjacent levels of the same building. One common German tactic in 'The Guards Counterattack' is to place a

HS in a ground floor Location of building 1F5 and another upstairs in the same hex. By using the 10-2 and three 6-2-8 squads, the Russian player can get an 8+1 Prep Fire shot against each. Roll snakes and that's both HS dead!

One final thing to remember is that A7.34 limits SQUAD spraying fire to a three hex range. This is something I misplayed for a number of years, and sometimes still see incorrectly played.

Are You For Real? A Simple Dummies System for Solo Play

Mike Willner

I use a reasonable and simple way to handle "?" counters in solo play. It kind of assumes the concealed side is defending and more or less static:

- Arrange the defender in fire teams i.e. an LMG, a MMC, and a leader or whatever.
- Deploy two "?" counters in tactically reasonable Locations for each fire team.
- Write down the two "?" counters associated with each fire team i.e. Team 1 linked to "?" counters A and B. The actual fire teams are held off board.

In play, when a situation occurs where the "?" would be lost (EX: it is under fire and needs to take a MC) I roll two D6, one for each potential "?" Location, and the higher roll is where the fire team ends up (ties are re-rolled). So, if "?" A comes under fire and needs to take an MC I roll two D6, one for A one for B and whichever is higher is where the fire team lands. If it ends up in the Location under fire, it takes the MC, otherwise it is placed under the "?" in the other Location and it enjoys the benefits of "?" until lost in the normal course of events.

At any point I can decide that I want a fire team with a particular "?" counter (EX: to do some defensive fire, or move). Then I just place the fire team under the "?" and carry on.

All in all this system is very simple but keeps me a bit uncertain about the exact location of all the defending units.

David Murray, 29 Middle Street, Nafferton, Driffield, S. Yorks, YO25 4JS (02 Sep 2008)

ON THE CONVENTION TRAIL

There are more and more *ASL* tournaments cropping up all over the world. In fact, it is possible to be involved in an *ASL* tournament at least once a month, often more, if you were so inclined (and had the financial means to live such a life - I wish!).

If you plan on holding an *ASL* tournament, please let me know and I'll include the details here, space permitting.

If you contact anyone regarding these tournaments, please tell them that I sent you!

MAY

STOCKHOLM ASL TOURNAMENT 2015

When: 15 – 17 May.

Where: Metapontum Gymnasium, Långbroparken, Stockholm, Sweden.

Fee: 200 SEK (€22).

Format: Five round tournament starting early afternoon, with two rounds on Friday, two on Saturday, and one on Sunday. There will be two scenarios to choose from in each round, with all scenarios coming from the *Hakkaa Päälle!* module.

Contact: Mel Falk by email at melkalf@hotmail.com.

JUNE

DOUBLE ONE 2015

When: 26 – 28 June.

Where: Writtle College, Chelmsford, Essex, CM1 3RR. On-site facilities include en-suite and standard bedrooms, free car parking on application, mini market, cash points, a self-service cafeteria and licensed bars. Bedroom rates start at £30.00 for a single room and breakfast.

Fee: £15.00 if paid before 30 April, £20.00 thereafter.

Format: A two day tournament with two rounds on Saturday and one on Sunday offering a choice of scenarios. A number of mini-tournaments are also planned for Friday, and friendly games will also be available.

Contact: For a booking form contact Derek Cox, Whiteways, 77a St Nicholas Road, Witham, Essex, CM8 2JE or by email at derek@doubleone-online.net. Check out the web site at <http://www.doubleone-online.net/1.html> for the latest details.

NOVEMBER

INTENSIVE FIRE 2015

When: 5 – 8 November.

Where: The Travel Rest Hotel, West Hill Road, Bournemouth, England, BH2 5EG. Telephone (01202) 555 889 or fax (01202) 789 567 to arrange accommodation. Room rates are £47 per night for a single room, and £37 per night per person for a double room.

Fee: £15.00 if registering with the organisers before 1 November, £20.00 thereafter and on the door (entry is free for those only able to attend for one day). In addition to a discount on the entry fee, players pre-registering will receive a tournament program in September.

Format: Three round Fire Team tournament (two rounds on Saturday, one on Sunday). There will also be some single day mini-tournaments on the Friday. Open gaming is available for those who do not wish to take part in the tournament.

Contact: For more details or to register contact Pete Phillipps, 19 Main Street, Kirkliston, Scotland, EH29 9AE. Phone (1031) 629 1260 (evenings only) or email if@vfft.co.uk. For up to date information check out the UK *ASL* tournament web site at www.vfft.co.uk.

2016

FEBRUARY

SCANDANAVIAN ASL OPEN

When: 19 – 21 February (provisionally. Date to be confirmed soon).

Where: Danhostel Copenhagen Amager, Vejlands Allé 200, 2300København S, Denmark. Accommodation is available at a cost of 1500 Danish Kroner (about €200) per person sharing a four person bedroom including breakfast, lunch and dinner. Other room options are available – contact the organisers for a price.

Fee: Similar to 2015, which was 200 Danish Kroner (about €27).

Format: The tournament will be a five round Swiss style affair.

Contact: Michael Hastrup-Leth, Favrhølmvænget 15, 3400 Hillerød, Denmark, or email at hastrupleth@gmail.com. For the latest information visit the website at <http://www.asl-so.dk/>.

MARCH

HEROES 2016

When: 10 – 13 March.

Where: Colwyn Hotel, 569 New South Promenade, Blackpool, England, FY4 1NG. Tel 01253 341 024. Room rates are £31.00 for a shared room or £34.00 for a single room and include breakfast. Bar meals and good beer are also available at the hotel.

Fee: £15.00 if registering with the organisers prior to 1 March, £20.00 thereafter and on the door (entry is free for those only able to attend for one day). In addition to a discount on the entry fee, players pre-registering will receive a tournament program in February.

Format: Four round tournament beginning Friday morning, with three scenarios to choose from in each round. There will be an additional round on Friday after if the number of participants warrants it. Players will be expected to have knowledge of the first half of the Chapter G rules to play in the tournament. CG and friendly games can also be found throughout the weekend. There will also be opportunities for new players to learn the game and friendly games available.

Contact: For more details or to register contact Pete Phillipps, 19 Main Street, Kirkliston, Scotland, EH29 9AE. Phone (1031) 629 1260 (evenings only) or email if@vfft.co.uk. For up to date information check out the UK *ASL* tournament web site at www.vfft.co.uk.

LASL

L o n d o n ' s
A d v a n c e d S q u a d
L e a d e r s

London's Advanced Squad Leaders (LASL) welcome ASL/ASLSK players or potential players. If you're passing through or staying over in London, you're welcome to come along and take part. There's no fee for taking part or spectating.

We usually meet on the second Saturday of each month from 10.30am until 5.30pm. LASL's venue is located in the lower ground floor of Starbucks, 32 Fleet Street, London, EC4Y 1AA. It's quiet and has space for up to 20 games.

If you want to come along send your name and contact details to derek@doubleone-online.net to arrange a game and ensure there are no last minute problems.

Ω

INTENSIVE FIRE 2015

5 – 8 NOVEMBER 2015

INTENSIVE FIRE is the UK's longest running tournament dedicated to the play of Advanced Squad Leader. 2015 sees us enter our 21st year and players of all standards are invited to attend.

FORMAT

The well-established Fire Team Tournament is the main event and offers the chance for competitive play on the Saturday and Sunday. In addition, the Friday mini-tourneys offer the chance for glory in more specialised fields of warfare. There will also be a Training Camp for inexperienced players.

For those not interested in tournament play, or not able to make it for the whole weekend, there is always room for pick-up games and friendly play.

VENUE

Centrally located in Bournemouth, the Travel Rest offers both excellent gaming facilities and reduced accommodation rates (£47 per night for a single room or £37 per night per person for a double room). The hotel is within a short taxi-ride of Bournemouth rail station and ample parking is available. To book contact the hotel on (01202) 555 889 (+44 1202 555 889 from outside the UK). You can also book online at <http://www.travelrest.co.uk/Default.aspx?pagename=Bournemouth-Travelrest-hotel>.

For foreign visitors, lifts can often be pre-arranged to and from major airports. For those contemplating an extended stay, Bournemouth offers an excellent base for the military historian, being within easy reach of important military museums at Bovington Camp, Winchester, Portsmouth and Aldershot.

COST

Weekend registration for the tournament costs just £20, or just £15 if you register before 1st November. The tournament program listing the weekend's scenarios and events is available from the start of October to anyone registering in advance.

FURTHER DETAILS / REGISTRATION

Contact Pete Phillipps, 19 Main Street, Kirkliston, Midlothian, EH29 9AE. Telephone (0131) 629 1260 (+44 131 629 1260 from outside the UK) or email if@vftt.co.uk.
